Electrostatic Disinfectant Application Notice

September 4, 2020

Dear Parent, Guardian or Staff Member:

I am writing to inform you that RSU 20 will use electrostatic sprayers to assist with disinfecting of all our buildings, buses and classrooms. These sprayers will be used in the evenings after all students and staff have left the buildings, buses and classrooms. This disinfection is being done to help manage the COVID 19 virus as part of our Integrated Pest Management Program (IPM) to ensure a healthy school environment. This notice is being provided in accordance with the Maine Board of Pesticides Control.

For further information regarding this action please contact the IPM Coordinator,
Russ Flagg, Director of BG&T at 548-6643.

Sincerely,

Russ Flagg
